Re: 2021 and 2022 Community Development Fund of the Community Development  
Block Grant (CDBG) Program  
City of Brazoria, Texas (City)

Dear Nancy,

The City intends to apply for the use of CDBG funds to extend the force main, which currently facilitates the discharge of the sanitary sewer lift station on Hutson Lane. The current force main discharges into a manhole near the intersection of 5th Street and Brazos Street, and has been known to cause issues with sewage backing up into the neighborhood downstream. The force main extension project would extend and relocate the force main discharge to a manhole approximately 3,000 linear feet to the south, along the main trunk sewer line, which flows to the wastewater treatment plant.

One of the main customers served by the Hutson Lane lift station is West Brazos Junior High School, located to the northwest of the lift station, across Highway 36. Since this force main extension project would benefit the entire service area of the lift station, including the school, in the opinion of Strand Associates, Inc.®, the entire City extraterritorial jurisdiction could be considered a beneficiary of this project.

Please call 979-836-7937 should you have any questions.

Sincerely,

STRAND ASSOCIATES, INC.®
